Observation Glossary

Type: The suspected type of the observed video: full-length, video clip, preview video clip, edited video clip, or segment.[†]

Show: The title of the observed program (if available).

Episode: The title of the observed episode (if available).

Segment/Clip Name: The title of the observed segment/clip (if available).

Internet VPD: The VPD that distributed the observed video.

Test Date: The date of the observation.

Network: The television network that originally published or exhibited the video.

TV Air Date: The date of the video's publication or exhibition on television.

Device: The device used for observation.

OS: The operating system and version used for observation.

Browser: The name of the browser used for testing (if applicable), or name of the application used for testing on mobile devices (if applicable).

Captioned?: "Yes," if closed captions were provided and rendering was enabled; "No" if not.

[†] See discussion *supra*, Part II.B (elaborating on the difficulty in distinguishing between segments and video clips).
